ABOUT ME

I have always been passionate by IT and web. Back to 2000-2005 i used to create my own html and flash websites . I then chose other ways but now that I finished successfully my 490 hours intensive bootcamp, I am sure that this job is made for me! I am a fast learner and I love problem-solving. I am open to learn new languages, frameworks and technologies I don't know. As for my soft skills, I like people and I know how to adapt to new teams. I am not afraid to speak in public and take decisions if needed.

I am available right now and really want to succeed, why not with you?
